DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 9 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Granger (US 5463720).

Referring to claims 9:

There are many examples of the conventional, and notoriously old and well known, general technique of processing image data in a periodic cell format into an aperiodic cell format to avoid or reduce the appearance of spatial artifacts, such as Moire patterns, when printing or displaying the image data.

Granger disclose a method of manipulating image data comprising the steps of:

- a) receiving the image data in a periodic cell format at a processor 710; and
- b) sampling the image data into an aperiodic cell format (col. 37, line 59 to col. 38, line 9).

Referring to claims 14:

The periodic cell format in Granger is used for a printer description language (col. 9, lines 18-22).

Allowable Subject Matter

Claims 10-13 and 15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 1-8 and 16-20 are allowed. The following is a statement of reasons for the indication of allowable subject matter: The prior art searched and of record neither anticipates nor suggests in the claimed combinations, sampling image data in an aperiodic cell format into a predetermined periodic cell format nor rendering image data in an aperiodic format from an aperiodic input device on an aperiodic output device.
